ORDER

APPLICATION 25454

PERMIT 18060

LICENSE 11948

ORDER DIRECTING ISSUANCE OF SEPARATE LICENSES
AND REVOCATION OF THE ORIGINAL LICENSE

WHEREAS:

1. License 11948 was issued to George B. Taves and Faye W. Taves and was filed with the County Recorder of Amador County on March 24, 1986, in book 484 on pages 101 and 102.
2. A request for division of the license has been filed with the State Water Resources Control Board and said Board has determined that good cause for such division has been shown.
3. The Board has determined that the requested license division does not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.

NOW, THEREFORE, IT IS ORDERED THAT:

1. License 11948 be replaced by Licenses 11948A and 11948B.
2. License 11948 is hereby revoked upon issuance of Licenses 11948A and 11948B.

License for Diversion and Use of Water

APPLICATION 25454
Page 1 of 3

PERMIT 18060

LICENSE 11948

THIS IS TO CERTIFY, That George B. Taves and Faye W. Taves
13327 Taves Road
Jackson, California 95642

(over)

have made proof as of May 14, 1985 (the date of inspection)
to the satisfaction of the State Water Resources Control Board of a right to the use of the water of
an Unnamed Stream in Amador County

tributary to Jackson Creek thence Dry Creek thence Mokelumne River

for the purpose of Recreational use

under Permit 18060 of the Board and that the right to the use of this water has been perfected
in accordance with the laws of California, the Regulations of the Board and the permit terms; that the
priority of this right dates from August 12, 1977 and that the amount of water to which
this right is entitled and hereby confirmed is limited to the amount actually beneficially used for the stated
purposes and shall not exceed a total of six and seven-tenths (6.7) acre-feet per
annum to be collected from November 1 of each year to April 1 of the succeeding
year as follows: (1) 0.9 acre-foot per annum in Reservoir #2, and (2) 5.8 acre-
feet per annum in Reservoir #3.

The maximum rate of diversion to offstream storage shall not exceed 2 cubic
feet per second.

This license does not authorize collection of water to storage outside of the
specified season to offset evaporation and seepage losses or for any other
purpose.

(0000005)

After the initial filling of the reservoirs, licensee's right under this
license extends only to water necessary to keep the storage reservoirs full by
replacing water lost by evaporation and seepage, and to refill if emptied for
necessary maintenance or repair.

(0000040)

THE POINT OF DIVERSION AND DIVERSION TO OFFSTREAM STORAGE OF SUCH WATER IS
LOCATED:

Reservoir #2 - North 2,050 feet and East 1,850 feet from SW corner of
Section 5, T6N, R12E, MDB&M, being within NE $\frac{1}{4}$ of SW $\frac{1}{4}$ of said Section 5.

THE PLACE OF OFFSTREAM STORAGE OF SUCH WATER IS LOCATED:

Reservoir #3 within NE $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 5, T6N, R12E, MDB&M.

DESCRIPTION OF THE LANDS OR THE PLACE OF USE WHERE SUCH WATER IS PUT TO
BENEFICIAL USE IS AS FOLLOWS:

At Reservoir #2 and Reservoir #3, both within NE $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 5, T6N,
R12E, MDB&M, as shown on map on file with State Water Resources Control Board.

This license is subject to prior rights. Licensee is put on notice that during
some years water will not be available for diversion during portions or all of
the season authorized herein. The annual variations in demands and hydrologic
conditions in the Mokelumne River Basin are such that in any year of water
scarcity the season of diversion authorized herein may be reduced or completely
eliminated on order of this Board made after notice to interested parties and
opportunity for hearing.

(0000090)

Licensee shall allow representatives of the Board and other parties, as may be authorized from time to time by the Board, reasonable access to project works to determine compliance with the terms of this license.

The quantity of water diverted under this license is subject to modification by the State Water Resources Control Board if, after notice to the licensee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

Pursuant to California Water Code Sections 100 and 275 and the public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses, prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

This continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to minimizing waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement such programs as (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the board determines, after notice to affected parties and opportunity for hearing, that such action takes into account the public interest and is necessary to protect public trust uses. All such actions shall conform to the standard of reasonableness contained in Article X, Section 2 of the California Constitution.

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the Board.

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the Board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.
